

**Phone Log, Communication with Chris Sabick on February 27, 2015,
Archaeological Director, Lake Champlain Maritime Museum**
(with email confirmation of log)

PHONE LOG	
Project Number/Task : 2001283.08.01	
Project Name: ELIS Dredge Spoil Disposal SEIS	
Name: Dell Gould	
Person Called/Caller: Christopher Sabick (call back from an earlier voice mail left with him on 2/26/2015)	Date: 2/27/2015
Title/Organization: Archaeological Director/ Lake Champlain Maritime Museum	Time: 11:49am
Phone Number: 802.475.2022	Length: 8 min
Content of Call: Called to inquire regarding typical practices for avoidance of underwater resources. Chris confirmed he was not aware of any federal agency standards or widely accepted practices, and each resource is typically treated on a case-by-case basis. His experience with NY SHPO was that they have been settling in around a 40 to 50 meter buffer for submerged resources in freshwater contexts, and this is what he typically uses as a minimum recommended distance when consulted.

Subject: RE: Our Phone Discussion in February

Dell,

Yes that seems to be a good summary of our conversation.

Sorry for the delay in response...the Fall CRUNCH is on here at the LCMM and I'm spending most of my time underwater!

Hope you are well.

Chris

Chris

Have you had a chance to look at this yet?

Thanks

Dell

Subject: Our Phone Discussion in February

Chris

I hope you are doing well. We had a brief discussion back in February, during which I asked about any state or federal agency standards for buffers around underwater archaeological resources that you were aware of.

I've attached the phone log I kept of our conversation for the admin record. Do you think the discussion we had is accurately reflected in the text of the log?

Thanks, and let me know if you have any questions.

Dell
